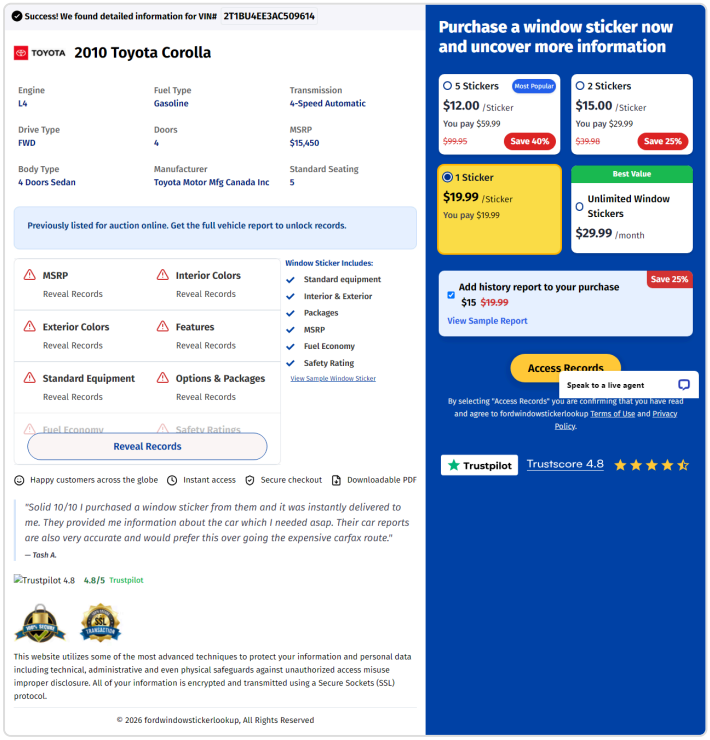
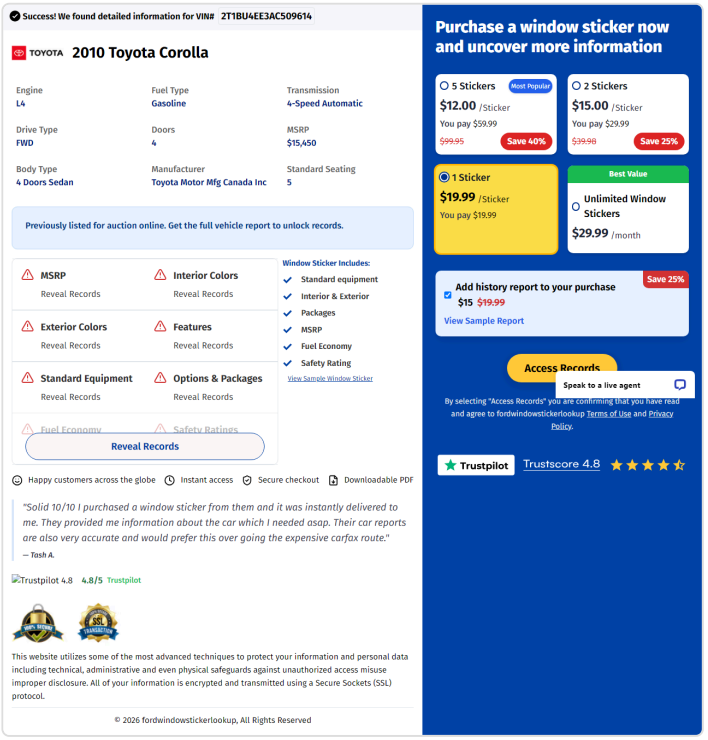
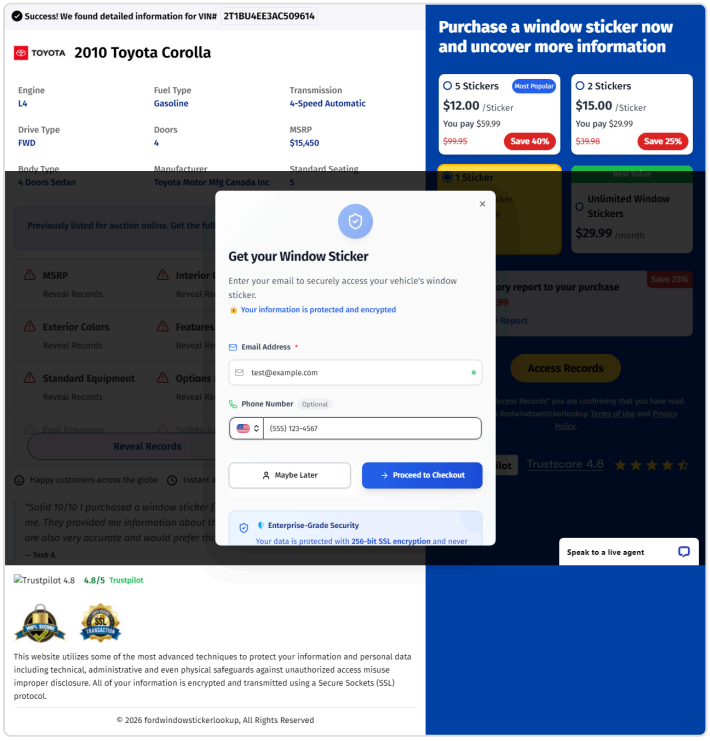
PROD Preloader Evidence



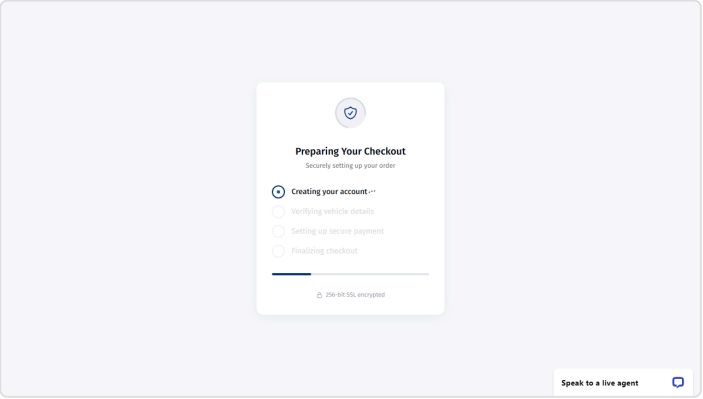
TC-01 — PROD Preview Page



TC-02 — #landing_decal Auto-Selected



TC-04/05 — PROD Email + Phone Popup



TC-07 — PROD Preloader Screen

5. PROD — Coupon Validation Test Cases NEW

#	Test Case	Expected	Actual	API Response	Status
TC-01	Open Checkout page	Page loads, price shows $34.99	Loaded — Pay $34.99	—	✅ Pass
TC-02	Enter valid coupon `get20` → Apply	API returns 200, price discounted	API 200 · $34.99 → $30.99	200 OK · 9,627ms	✅ Pass
TC-03	API response body — valid coupon	status: success, coupon_status: valid coupon	Matches expected	200 OK	✅ Pass
TC-04	Enter invalid coupon `get323523` → Apply	API returns invalid, price unchanged	API 200 · coupon_status: invalid · Price held $30.99	200 OK · 8,137ms	✅ Pass
TC-05	Previous valid discount not reset	Price stays at $30.99 after invalid coupon	Price held at $30.99 ✅	—	✅ Pass

API Responses — /api-cwa/coupon_validation

✅ Valid Coupon "get20" — 200 OK · 9,627ms

```
POST /api-cwa/coupon_validation
Status : 200 OK
Time   : 9,627 ms

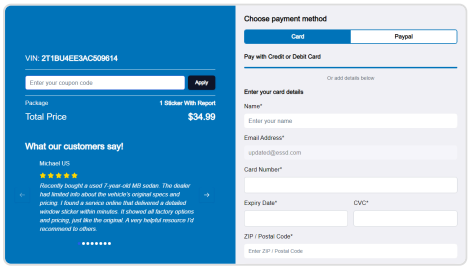
{
  "status": "success",
  "data": {
    "coupon_status": "valid coupon",
    "off_on_purchase": "20"
  }
}
```

❌ Invalid Coupon "get323523" — 200 OK · 8,137ms

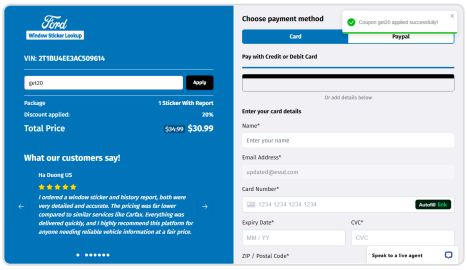
```
POST /api-cwa/coupon_validation
Status : 200 OK
Time   : 8,137 ms

{
  "status": "success",
  "data": {
    "coupon_status": "invalid coupon"
  }
}
```

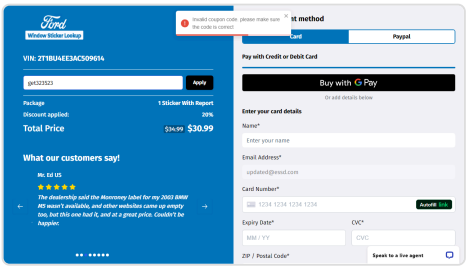
Coupon Validation Evidence



TC-01 — Checkout Initial ($34.99)



TC-02 — Valid Coupon Applied ($30.99)



TC-04 — Invalid Coupon (Price Held $30.99)

6. Timing Summary

Flow	Metric	Time	Threshold	Result
DEV Preloader → Checkout	Navigation time	10.15s	< 30s	✅ Pass
PROD Preloader → Checkout	Navigation time	4.75s – 9.59s	< 30s	✅ Pass
PROD Coupon API — valid	API response time	9,627ms	< 15s	✅ Pass
PROD Coupon API — invalid	API response time	8,137ms	< 15s	✅ Pass

7. Preview Page Changes — DEV vs PROD

Change	DEV	PROD	Status
`#landing_decal` checkbox	Not tested	Auto-selected on load ✅	✅ Verified
Popup submit button	"Access Records"	"Proceed to Checkout"	ℹ Updated
Phone field in popup	Not present	Present (optional)	ℹ New Field
Coupon field on checkout	Not tested	Functional — discount applied correctly	✅ Verified
Domain	dev.dodgewindowsticker.com	fordwindowstickerlookup.com	✅ Live

8. UX Observations

	Observation	Severity
✅	#landing_decal auto-selection improves UX — no manual selection needed	—
✅	PROD checkout time (4.75s) faster than DEV (10.15s)	—
✅	Valid coupon correctly discounts price; invalid coupon does not reset previous discount	—
⚠️	Coupon API response time ~8–10s is slow — consider optimising	Medium
⚠️	No timeout/error state if backend takes > 20s on preloader	Low
⚠️	Browser back during preloader may cause broken state	Low

9. Sign-off

Role	Name	Status
QA Engineer	Shahnawaz	✅ Verified & Report Complete
